Performance

Metrics

	First Contentful Paint 1.3 s	▲	Time to Interactive 10.0 s
	Speed Index 4.4 s	▲	Total Blocking Time 2,800 ms
▲	Largest Contentful Paint 7.2 s		Cumulative Layout Shift 0.242

Values are estimated and may vary. The performance score is calculated directly from these metrics. See calculator.

Opportunities — These suggestions can help your page load faster. They don't directly affect the Performance score.

Opportunity	Estimated Savings
▲ Remove unused JavaScript	2.25 s
Remove unused CSS	0.15 s
▲ Reduce initial server response time	0.03 s

Diagnostics — More information about the performance of your application. These numbers don't directly affect the Performance score.

- ▲ Ensure text remains visible during webfont load
- ▲ Reduce the impact of third-party code — Third-party code blocked the main thread for 1,390 ms
- ▲ Does not use passive listeners to improve scrolling performance
- ▲ Minimize main-thread work — 8.0 s
- ▲ Serve static assets with an efficient cache policy — 10 resources found
- ▲ Reduce JavaScript execution time — 4.7 s
- Avoid an excessive DOM size — 1,240 elements
- Avoid chaining critical requests — 2 chains found
- Keep request counts low and transfer sizes small — 35 requests • 1,037 KB
- Largest Contentful Paint element — 1 element found
- Avoid large layout shifts — No elements found

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

- ▲ Background and foreground colors do not have a sufficient contrast ratio.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

- ▲ Image elements do not have `[alt]` attributes

Best practices — These items highlight common accessibility best practices.

- ▲ `[user-scalable="no"]` is used in the `<meta name="viewport">` element or the `[maximum-scale]` attribute is less than 5.

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

Passed audits (22)

Not applicable (16)

Best Practices

Trust and Safety

- Includes front-end JavaScript libraries with known security vulnerabilities — 4 vulnerabilities detected

User Experience

- Displays images with inappropriate size

General

- Browser errors were logged to the console

SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. Learn more.

Content Best Practices — Format your HTML in a way that enables crawlers to better understand your app's content.

▲ Image elements do not have `[alt]` attributes

Mobile Friendly — Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. Learn more.

Tap targets are not sized appropriately — 85% appropriately sized tap targets

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.
