## Performance

**Metrics**

| | | | |
|---|---|---|---|
| First Contentful Paint | 2.3 s | First Meaningful Paint | 2.3 s |
| ▲ Speed Index | 7.0 s | ▲ First CPU Idle | 8.4 s |
| ▲ Time to Interactive | 8.8 s | ▲ Max Potential First Input Delay | 1,540 ms |

View Trace

Values are estimated and may vary. The performance score is based only on these metrics.

**Opportunities** — These suggestions can help your page load faster. They don't directly affect the Performance score.

| Opportunity | Estimated Savings |
|---|---|
| Preconnect to required origins | 0.75 s |

**Diagnostics** — More information about the performance of your application. These numbers don't directly affect the Performance score.

- ▲ Reduce the impact of third-party code — Third-party code blocked the main thread for 640 ms
- ▲ Minimize main-thread work — 12.6 s
- ▲ Serve static assets with an efficient cache policy — 10 resources found

▲ Reduce JavaScript execution time — 5.1 s

Avoid an excessive DOM size — 1,242 elements

Avoid chaining critical requests — 2 chains found

Keep request counts low and transfer sizes small — 38 requests • 774 KB

**Passed audits (16)**

## Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Contrast** — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Image elements do not have `[alt]` attributes

**Best practices** — These items highlight common accessibility best practices.

▲ `[user-scalable="no"]` is used in the `<meta name="viewport">` element or the `[maximum-scale]` attribute is less than 5.

**Additional items to manually check (11)** — These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

**Passed audits (18)**

**Not applicable (14)**

# Best Practices

- ▲ Does not use HTTP/2 for all of its resources — 8 requests not served via HTTP/2
- ▲ Does not use passive listeners to improve scrolling performance
- ▲ Includes front-end JavaScript libraries with known security vulnerabilities — 2 vulnerabilities detected

**Passed audits (12)**

## SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. Learn more.

**Content Best Practices** — Format your HTML in a way that enables crawlers to better understand your app's content.

- ▲ Image elements do not have `[alt]` attributes

**Mobile Friendly** — Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. Learn more.

- Tap targets are not sized appropriately — 83% appropriately sized tap targets

**Additional items to manually check (1)** — Run these additional validators on your site to check additional SEO best practices.

**Passed audits (11)**

## Progressive Web App

These checks validate the aspects of a Progressive Web App. Learn more.

**Fast and reliable**

Page load is fast enough on mobile networks

▲ Current page does not respond with a 200 when offline

▲ `start_url` does not respond with a 200 when offline No usable web app manifest found on page.

**Installable**

Uses HTTPS

▲ Does not register a service worker that controls page and `start_url`

▲ Web app manifest does not meet the installability requirements Failures: No manifest was fetched.

**PWA Optimized**

Redirects HTTP traffic to HTTPS

▲ Is not configured for a custom splash screen Failures: No manifest was fetched.

▲ Does not set a theme color for the address bar.
Failures: No manifest was fetched, No `<meta name="theme-color">` tag found.

Content is sized correctly for the viewport

Has a `<meta name="viewport">` tag with `width` or `initial-scale`

Contains some content when JavaScript is not available

Provides a valid `apple-touch-icon`

**Additional items to manually check (3)** — These checks are required by the baseline PWA Checklist but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
